REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Wound dressings are known as demonstrated by the prior art of reference. The closest prior art of record is that of U.S. Patent No. 6,207,875 issued to Lindqvist et al. Lindqvist et al. disclose a wound dressing that anticipates applicant's presently claimed invention. More specifically, as can be seen in Fig. 2, Lindqvist et al. disclose a wound dressing (7) comprising an absorbent core (2') having opposed proximal and distal surfaces and a discrete skin adherent, elastomeric gel layer (3') disposed along the proximal surface of the absorbent core. The elastomeric gel layer has a plurality of through extending apertures arranged in a pattern, formed by the gel extending into holes (6) in the absorbent core.

2. The prior art of record does not teach or fairly suggest a wound dressing comprising an absorbent core having opposed proximal and distal surfaces, the absorbent core including a pattern of holes defined along the proximal surface thereof; and a discrete skin adherent, elastomeric gel layer disposed along the proximal surface of the absorbent core, said elastomeric gel layer having a plurality of through extending apertures provided in a pattern irrespective of the pattern of holes of the absorbent core, as recited in claim 21..

3. The prior art of record also fails to teach a wound dressing comprising: an absorbent core having opposed proximal and distal surfaces, the absorbent core including a pattern of holes defined along the proximal surface thereof; and a discrete skin adherent, elastomeric gel layer disposed along the proximal surface of the

absorbent core and at least partially filling a plurality of the holes of the absorbent core, said elastomeric gel layer having a plurality of through extending apertures provided in a pattern irrespective of the pattern of holes of the absorbent core, as recited in claim 29.

4. The prior art of record event further fails to teach a wound dressing comprising: an absorbent core having opposed proximal and distal surfaces, the absorbent core including a pattern of holes defined along the proximal surface thereof; and a facing layer consisting a discrete skin adherent, elastomeric gel directly disposed along the proximal surface of the absorbent core, said elastomeric gel layer having a plurality of through extending apertures provided in a pattern irrespective of the pattern of holes of the absorbent core, as recited in claim 31

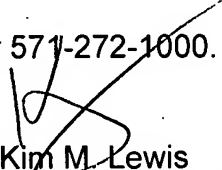

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kim M. Lewis whose telephone number is (571) 272-4796. The examiner can normally be reached on Monday to Friday, from 8:30 am to 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Patricia Bianco, can be reached on (571) 272-4940. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
